DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 54-57, 117 and 118, drawn to a method of altering amino acid composition of a protein, classified in class 435, subclass 440.
 - II. Claims 58-83, 97-107, 115 and 116, drawn to a method of altering the amino acid composition of a protein where essential amino acid levels are increased, classified in class 435, subclass 440.
 - III. Claims 84-96, drawn to a protein with altered amino acid composition, classified in class 530, subclass 350.
 - IV. Claims 108-114, drawn to a vegetative storage protein having altered amino acid composition, classified in class 530, subclass 370.
2. The inventions are distinct, each from the other because of the following reasons:
3. Each of Groups I and II is directed to a separate and distinct invention. Group I is directed to a method of altering amino acid composition of a protein and Group II is directed to a method of altering the amino acid composition of a protein where essential amino acid levels are increased. These methods are distinct both physically and functionally, require different process steps, reagents and parameters and produce different products.

Art Unit: 1652

4. Each of Groups III and IV is directed to a separate and distinct invention. Group III is directed to a protein with altered amino acid composition and Group II is directed toward a vegetative storage protein having altered amino acid composition

The products of Groups III and IV would be expected to have distinct morphological, functional, chemical and physical properties as indicated by their divergent classification, process of making and process of using. These products are capable of separate manufacture, use, or sale as claimed, and are patentably distinct.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Tung, Ph.D. whose telephone number is (703) 308-9436. The examiner can normally be reached on Monday-Friday from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy, Ph.D., can be reached on (703) 308-3804. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
